Waveguide Length:

2.125 inches

Specified Frequency:

27.0 gigahertz

Special Features:

Body thread size 1.625 - 20 nef; clearance hole diameter 1.656 inch; material steel with electroless nickel finish; twelve waveguide bore slots 0.257 inch diameter for fiber optic cables with attached connectors; removable center plug; plug bore diameter 1.000 inch; one thousand wgf-12 waveguides could be installed into a shielded enclosure and maintain 100 decibel attenuation at 18.0 gigahertz

Flexibility:

Rigid single tubing segment

Style Designator:

Straight type

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A073a0
