Voltage Rating:

24.0 volts

Radio Frequency Rating:

Between 20.0 megahertz and 3000.0 megahertz

Power Rating:

10.0 watts

Special Features:

Features 6u, single-slot, c-size vxi, 8 outputs, input protection; high port to port isolation; 8 outputs; gain 1 porm 1 db; gain flatness porm 1.75 db, typical, porm 2 db max; in/out impedance 50; in/out vswr 2.0: 1 max; noise figure 7.5 db, typical, 10.5 db at 20 mhz; input for 1 db compression plus 5.5 dbm, typical; 3rd order input intercept point plus 19.5 dbm, min; 2nd order input intercept point plus 37 dbm min; isolation out-out 25 db min; isolation out-in 40 db min, 50 db typical; input connector type n; output connector sma female; powered from vxi bus, p2, 24v, 10w max; operating temp 0 to 50 degrees c; style vxi, c size, single slot

Functional Description:

Designed for compatibility with wide frequency range signal collection and signal analysis systems requiring up to 8 outputs from a single antenna input

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T389-c
