Frequency Rating:

60.000 megahertz single antenna element and 260.000 megahertz single antenna element

End Application:

Reconnaissance aircraft

Design Type:

Spiral single antenna element

Special Features:

Comprised of spiral radiator with associated cavity and feed network and is intended for fixed mounting in a special wing pod on aircraft; element diameter is 12 inches; flange diameter is 13-1/2 inches; cavity depth is 4-1/16 inches; antenna height 7 inches max; shall not exceed 11 pounds

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A074a0
