Furnished Items:

Reflector and mast

Frequency Rating:

10.950 gigahertz single antenna element and 12.750 gigahertz single antenna element

Operating Temperature Range:

-40.0/+60.0 degrees celsius

Special Features:

Description 3.7 meter ku-band rx only centerfed with az/el; antenna size 12 ft; midband gain 50.7 dbi; 3db beamwidth 0.5 degrees; insertion loss 0.2 db max; reflector material eight segment glass fiber reinforced polyester smc; antenna optics prime focus axisymmetric; elevation adjustment range 10 to 70 degree continuous adjustment; rain operation 0.5 in/hour; wind operational 45 mph

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
