Mounting Hole Quantity:

3

Frequency Rating:

1616.000 megahertz single antenna element and 1626.500 megahertz single antenna element

End Application:

An/tmq-53 meteorological system

Design Type:

Helix single antenna element

Mounting Method:

Flange

Terminal Type:

Receptacle, coaxial single antenna element

Product Name:

Iridium antenna

Functional Description:

Passive quad helix l-band antenna used with a3la and 9601 satellite modems for the iridium network

Reference Data And Literature:

To 31m1-2tmq53-1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A074a0
