Overall Length:

7.000 inches

Mounting Hole Diameter:

0.600 inches

Mounting Method:

Connector

Special Features:

Stub antenna designed to withstand the harsh environments associated with the underside of an aircraft. Antenna radiator is mechanically captivated and is sealed against leakage. All exposed metal surfaces are nickel-plated for corrosion resistance and long service. Bnc connector is standard; vertical polarization; material, nickel plated brass

Specification Data:

51351-faa tso government specification

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A074a0
