Special Features:

Transportable one-foot panel antenna suited for rapid deployment and ease of use. The mounting studs allow for the rf-7800w radio to be mounted directly to the antenna, reducing the antenna and radio profile (reducing wind loading) and minimizing the rf cable length. The antenna covers the frequency range 4.4 to 5 ghz (nato band iv) which includes the public safety band

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T174-d
