Product Name:

Antenna wire

Special Features:

Intended for use in external aircraft antennas to limit the starting of corona discharge in order to reduce radio interference of precipitation static noise; it consists of a 50-mil copper-clad steel wire conductor, insulated by a 66.5-mil sheath of brown-pigmented polyester with outstanding electrical characteristics; this wire will withstand external corona voltages up to 180 kv without breakdown; it also supports rf line voltages up to 3000 volts at 60 cps without corona onset; the wire is manufactured in accordance with mil-w-6370c, where applicable

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A074a0
