Product Name:

Transmit/receive new series 1385 3.8 vsat antenna

Special Features:

Upgraded integral rib design for higher frequency operation; increased strength for heavier radio and odu equipment loads; higher precision assembly and alignment from automated manufacturing processes; anti-ice capability for use in cold climate and arctic environmental conditions; optimized, 4-piece reflector design; upgradable for high xpd performance

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A074a0
