Application Design:

Waveguide

Body Style:

Waveguide type

Overall Length:

2.500 inches

Overall Width:

2.250 inches

Voltage Standing Wave Ratio:

1.15

Insertion Loss At Minimum Attenuation In Maximum Decibels:

0.5

Overall Attenuation Range In Decibels:

+0.0/+20.0

Frequency Range:

Between 8.200 gigahertz and 12.400 gigahertz

Product Name:

Sidewall variable attenuator

Special Features:

Aluminium alloy construction with chromated finish; cover flanges supplied as standard

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A223a0
