**Body Material:**

Aluminum

**Terminal Material:**

Nickel

**Product Name:**

Chip attenuator

**Special Features:**

Frequency range 0.0000-12.4 ghz; operating temperature neg 55 to pos 150 degrees celcius; input power 100 milliwatts cw

**Special Test Features:**

Test for vibration, shock and moisture resistance

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A20000
