Body Material:

Aluminum

Terminal Material:

Nickel

Product Name:

Chip attenuator

Special Features:

Frequency range 0.0000-12.4 ghz; operating temperature neg 55 to pos 150 degrees celcius; input power 100 milliwatts cw

Special Test Features:

Test for vibration, shock and moisture resistance

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A20000
