Overall Height:

33.8 feet

Frequency Rating:

30.0 megahertz and 512.0 megahertz single antenna element

End Application:

5820-01-579-0466

Design Type:

Dipole single antenna element

Features Provided:

Transportable

Product Name:

Transportable dual band dipole antenna

Special Features:

Transportable antenna with 75 watts power; connects to the low-band port of an an/prc-117g, rf-7800-mp, and the rf-300m-v255 via a tnc style connector using the included cables; it can be mounted and elevated using the trime and mounting hardware that is included in the kit; the antenna does not require ground plane; it weighs less than 45 pounds and stores in the included cordura bag

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A074a0
