End Application:

Traffic control and landing systems

Product Name:

Resolver, electrical

Special Features:

length 5.472 inches; flange diameter 3.000 inches; flange thickness 0.187 inches; undercut diameter 2.500 inches; mounting surface to terminal end distance 4.750; terminal type - connector; input voltage 26 vac; input frequency 500 hz; input current 50 ma; input voltage total harmonic distortion 5%

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
