**Body Size:**

15

**Rotor Input Voltage Rating In Volts:**

26.0

**Frequency In Hertz:**

400.0

**Rotor Input Current Rating:**

232.0 milliamperes

**Rotor Input Electrical Power Rating:**

0.8 watts

**Zso Resistance In Ohms:**

15.00

**Rotor Dc Resistance In Ohms:**

6.50

**Stator Dc Resistance In Ohms:**

3.00

**Phase Shift Angle In Deg:**

3.000 input to output

**Plus J Zso Reactance In Ohms:**

111.00

**Special Features:**

Synchro transmitter is motor driven; which consists of a dc motor and clutch; motor will operate at various speeds between 5 and 300 degrees per second; the unit shall be clutch and gear operated to obtain the two ranges

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A07800
