Body Size:

15

Rotor Input Voltage Rating In Volts:

26.0

Frequency In Hertz:

400.0

Rotor Input Current Rating:

232.0 milliamperes

Rotor Input Electrical Power Rating:

0.8 watts

Zso Resistance In Ohms:

15.00

Rotor Dc Resistance In Ohms:

6.50

Stator Dc Resistance In Ohms:

3.00

Phase Shift Angle In Deg:

3.000 input to output

Plus J Zso Reactance In Ohms:

111.00

Special Features:

Synchro transmitter is motor driven; which consists of a dc motor and clutch; motor will operate at various speeds between 5 and 300 degrees per second; the unit shall be clutch and gear operated to obtain the two ranges

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A07800
