Special Features:

Shaft detail slot permissible or optional

General Description:

Gsynchro, dual tandem; size 8; rotor as primary 26 volts input; 0.050 amps input current; 0.52 watts input power; 185 ohms d. C. Resistance; stator output voltage 11.8; ϕ 454 transformation ratio; 0.040 null voltage; 16 deg. Phase shift; 400 hz; 10 wire lead terminals; body lg 2.900 in. Max.; body dia. 0.795 in. Max.; shaft lg 0.485 max.; shaft radial play 0.008 in. Max. With 4.0 ounce load; shaft run-out 0.0016 in. Max. Measured 0.062 in. From shaft end

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
