General Description:

Light source-light emitting diode; three channel-sine, cosine, and index; output type-balance line driver, fairchild 9614; rated speed-5000 rpm; timing-cosine channel leads sin by 90 degrees plusorminus 45 degrees for cw rotation, sine channel leads cosine by 90 degrees plusorminus 45 degrees for ccw rotation; temperature range - operation -54 degrees c to +52 degrees c and storage -54 degr c to +70 degrees c; frequency range, each channel-0 to 20 khz

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23900
