End Application:

Peacekeeper stage iii

Special Features:

Relative axial position of rotor to stator shall be repeatable to within 50 microinch at each mechanical setting of rotational angle; output voltages shall be 730 mv plus or minus 230 mv and matched to within 60 mv; the error between the mechanical shaft angle and the resolver readout angle shall not exceed 2.0 degrees peak to peak when measured at 5 degree increments for a full revolution

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
