Special Features:

6 individual conductors, designated as wire no. 1 through 6 for identification in assembly. No. 1, 16 awg 10-1/2 in. Lg, black silicon insulation. No. 2, 22 awg, 21 in. Lg, red. No. 3, 20 awg, 5 in. Lg, red. No. 4, 20 awg, 7 in. Lg, white. No. 5, 20 awg, 6 in. Lg, black. No. 6, 20 awg, 6 in. Lg, blue. Wire no. 2 through 6, stranded, copper, silver coated, polytetrafluoroethylene insulation. Wire no. 1, 2, 4, 5 and 6 grouped longitudinally, w/3 in. Lg sleeve binder. Wire no. 2, 5 and 6 terminated w/terminal lug w/mtg hole at first end of assembly. Wire no. 3 incorporated into assembly by being terminated in common w/no. 2 by terminal lug for no. 2. All remaining wire ends of assembly terminated by stripping only

Fsc Application Data:

Landing light, aircraft

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
