Special Features:

Insulation resistance equals 100 meg; maximum capacitance equals 6.0 pf per inch; when tested with specified test circuit, max noise level shall be 90 mv on down level, 0.45 mv on up level; impedance from single circuit line to shield shall be 30 plus or minus 5 ohms as measured with time domain reflectometer; 19.120 in. Lg; 2.769 in. W; 0.155 in. H

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
