General Description:

Single uncoated copper conductor covered with polychloroprene insulation to diameter of 0.195 in. To 0.210 in.; insulation resistance 300 megohms; 600 volts; tab solder lug on each end with bare conductor looped through hole in small end of lug and soldered; heat shrink insulator tube 0.5 in. Dia, 1.5 in. Lg, covers cable connection to lug on one end; cable length 24.0 in. Form 0.50 from center of hole in large end of lug to center of hole in lug on other end
