Overall Length:

18.250 inches

End Application:

Aircraft model a-6e

Termination Type:

Connector external angle 1st end first conductorconnector external straight 2nd end second conductor

Conductor Quantity:

1

Special Features:

Max. Bend radius 2.500 in.; insertion loss; .30 db max. From 500 mhz to 2 ghz; capacitance: 27 pf/ft max. At 1.0 mhz; ambient operating tem; : -55 t+100 deg. C; connector types per mil-c-39012

Material:

Copper core conductor single conductor and plastic tetrafluoroethylene core conductor single conductor and stainless steel core conductor single conductor

Style Designator:

Internal angle and internal straight connector

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A077a0
