**Cross Sectional Shape:**

Round

**Electrical Resistance:**

50.0 ohms impedance

**End Application:**

CARR-IE-R,P-ERSM

**Termination Type:**

Connector both ends single conductor

**Conductor Quantity:**

1

**Conductor Form:**

Solid single conductor

**Product Name:**

Cable assembly, local area network (lan)

**Special Features:**

132 inches long

**Material:**

Steel core conductor single conductor

**Precious Material And Location:**

Surface single conductor silver and contact surfaces of connectors gold

**Precious Material:**

Silver and gold

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A077a0
