Cross Sectional Shape:

Round

Electrical Resistance:

50.0 ohms impedance

End Application:

CARR-IE-R,P-ERSM

Termination Type:

Connector both ends single conductor

Conductor Quantity:

1

Conductor Form:

Solid single conductor

Product Name:

Cable assembly, local area network (lan)

Special Features:

132 inches long

Material:

Steel core conductor single conductor

Precious Material And Location:

Surface single conductor silver and contact surfaces of connectors gold

Precious Material:

Silver and gold

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A077a0
