| Cross Sectional Shape:                              |
|---|
| Round   |
| Overall Length:                                     |
| 60.000 inches                                       |
| Electrical Resistance:                              |
| 50.00 ohms impedance                                |
| Tempurature Rating:                                 |
| -65.0 degrees celsius and 200.0 degrees celsius     |
| End Application:                                    |
| An/blq-10 (v) 4 system fy06, p/n 77c73370g001       |
| Conductor Quantity:                                 |
| 1   |
| Conductor Form:                                     |
| Solid single conductor                              |
| Terminal Manufacturer Identifying Reference Number: |
| 29714 2nd end single conductor                      |
| Terminal Commercial And Government Entity Code:     |
| 16301 both ends single conductor                    |
| Material:   |
| Copper core conductor single conductor              |
| Precious Material And Location:                     |
| Conductor surface and inner braid surface silver    |
| Precious Material:                                  |
| Silver  |
| Shelf Life:   |
| N/a   |
| Unit Of Measure:                                    |
|   |
| Demilitarization:                                   |
| Yes - demil/mli                                     |
| Fiig:   |
