Overall Length:

7.437 inches

Overall Height:

0.562 inches

Overall Width:

2.500 inches

Mounting Configuration:

Two mtg holes no. 8-32 thd spaced 7.062 in. Center to center

Special Features:

Mounting method: threaded holes; major components: capacitor, coil, radio frequency, resistor, semiconductor device, terminal board, transistor; component quantity: 32

Fsc Application Data:

Amplifier, video, radar, nonairborne, except fire control and guided missile

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A5110
