Overall Length:

5.380 inches

Overall Height:

2.370 inches

Overall Width:

4.312 inches

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Installation Design:

Mechanical

Circuit Construction Type:

Solid state

Frequency Per Channel:

8.4 gigahertz operating channel err-100

Average Power Rating Per Channel:

1.0 milliwatts output

External Dc Operating Voltage In Volts:

28.0 single voltage

Fsc Application Data:

Transmitter and exciter assembly, terminal, satellite, communications

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
