Overall Length:

2.625 inches

Overall Diameter:

0.812 inches

Basic Shape Style:

Cylindrical

Identification Designator:

Am427u-80058

Circuit Construction Type:

Electron tube

Frequency Per Channel:

4.300 megahertz operating channel

Variation Frequency Rating In Decibels:

1.2

Overall Gain:

23.0 decibels

External Dc Operating Voltage In Volts:

1.4 1st voltage

Intermediate Frequency Bandpass:

80.0 kilohertz

Fsc Application Data:

Radio set anprc10

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
