Overall Length:

1.040 inches

Overall Height:

0.720 inches

Overall Width:

0.820 inches

Mounting Configuration:

Four 0.025 in. Diameter wire leads irregularly spaced on corners of amplifier subassembly

Special Features:

Mounting method: wire lead; major components: insulating film, insulator, terminal, amplifier, capacitor, diode, transistor, resistor;

component quantity: 33

Fsc Application Data:

Computer, throttle control, approach power control set, automatic flight system

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A5110
