Overall Length:

0.985 inches

Overall Height:

0.800 inches

Overall Width:

0.820 inches

Special Features:

Mounting method: wire lead; major components: insulating film, amplifier, capacitor, diode, transistor, resistor, insulator, terminal; mounting configuration: four 0.025 in. Diameter wire leads on 0.750 in. By 0.650 in. Mtg centers; fsc application data: computer, throttle control, approach power control set, automatic flight system

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A51110
