**Overall Length:**

18.380 inches

**Overall Height:**

5.500 inches

**Overall Width:**

16.750 inches

**Basic Shape Style:**

Rectangular or square

**Installation Design:**

Free-standing

**Circuit Construction Type:**

Solid state

**Frequency Per Channel:**

1.0 gigahertz operating channel and 2.0 gigahertz operating channel

**Average Power Rating Per Channel:**

1.0 watts output

**Overall Gain:**

30.0 decibels

**Impedance Rating Per Channel:**

50.000 ohms input channel err-100

**Fsc Application Data:**

Sensor reporting post, an/apx-83

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A32200
