Overall Length:

18.380 inches

Overall Height:

5.500 inches

Overall Width:

16.750 inches

Basic Shape Style:

Rectangular or square

Installation Design:

Free-standing

Circuit Construction Type:

Solid state

Frequency Per Channel:

1.0 gigahertz operating channel and 2.0 gigahertz operating channel

Average Power Rating Per Channel:

1.0 watts output

Overall Gain:

30.0 decibels

Impedance Rating Per Channel:

50.000 ohms input channel err-100

Fsc Application Data:

Sensor reporting post, an/apx-83

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A32200
