Overall Length:

8.250 inches

Overall Height:

2.750 inches

Overall Width:

2.938 inches

Component Type And Quantity:

1 band and 3 capacitor and 1 inductor and 1 plug and 4 resistor

Special Features:

Mounting method: plugs in holder and retained by 4 snap screws; usage design: used as frequency determining network; fsc application data: amplifier, keyer, radio communication equipment except airborne

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511I0
