**Overall Length:**

8.250 inches

**Overall Height:**

2.750 inches

**Overall Width:**

2.875 inches

**Special Features:**

Consists of: fixed capacitors, variable capacitor, coils, connector, filters, resistors; mounting method: plugs into socket and retained by spring action; usage design: determines converter mark and space frequencies; mounting configuration: two 0.250 in. Diameter mtg holes spaced 2.500 in. Center to center; fsc application data: converter, radio and television communication equipment, except airborne

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A51110
