Overall Length:

8.250 inches

Overall Height:

2.750 inches

Overall Width:

2.875 inches

Special Features:

Consists of: fixed capacitors, variable capacitor, coils, connector, filters, resistors; mounting method: plugs into socket and retained by spring action; usage design: determines converter mark and space frequencies; mounting configuration: two 0.250 in. Diameter mtg holes spaced 2.500 in. Center to center; fsc application data: converter, radio and television communication equipment, except airborne

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A51110
