Overall Length:

4.700 inches

Overall Height:

0.875 inches

Overall Width:

2.300 inches

End Application:

Type no. C-1611/aic

Component Type And Quantity:

5 capacitor and 2 semiconductor and 1 transformer and 1 printed wiring board and 1 shield and 11 resistor and 1 transistor

Special Features:

1 mounting method: hole; mounting configuration: two 0.100 in. Diameter holes spaced 4.000 in. C to c, 0.150 in. Down from top; usage design: circuit subassembly for interphone control; fsc application data: control intercommunication set, airborne

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A5110
