Overall Length:

2.020 inches

Overall Height:

1.145 inches

Overall Width:

0.625 inches

Vibration Resistance Range In Hertz:

+10.0/+1000.0

Operating Temperature Range:

-25.0/+85.0 degrees celsius

Basic Shape Style:

Rectangular or square

Identification Designator:

Sa2-29832

Operating Control Method:

Manual

Control Type:

Local

Circuit Construction Type:

Solid state

Signal Voltage Rating Per Channel:

15.000 volts output

Impedance Rating Per Channel:

250.000 kilohms operating channel

Special Features:

Operating/storage temp m25 degrees c to p85 degrees c; circuit board material glass epoxy

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A32200
