Overall Length:

7.250 inches

Overall Height:

0.375 inches

Overall Width:

4.750 inches

Component Type And Quantity:

25 capacitor and 4 coil and 1 board and 55 resistor and 15 semiconductor and 5 transformer and 11 transistor

Special Features:

Mounting method: socket

Fsc Application Data:

Power factor meters, except specially designed

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A51110
