Overall Length:

3.905 inches

Overall Height:

1.300 inches

Overall Width:

2.525 inches

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Installation Design:

Mechanical

Circuit Construction Type:

Solid state

Frequency Per Channel:

4.0 gigahertz operating channel err-100

Frequency Adjustment Type:

Continuous

Special Features:

Plus 15.0v, 110 ma external dc operating voltage

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A32200
