Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Circuit Construction Type:

Solid state

Frequency Per Channel:

8.0 gigahertz operating channel err-100

Frequency Adjustment Type:

Continuous

Special Features:

Minus 12.0v, 540 ma external dc operating voltage

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A32200
