**General Description:**

Offers bias current approaching that of amplifiers having input stages, but without this performance limitations of these other unit, amplifier are extremely slow, with slew rates on the order of 0.4 volts/millisecond, input stages very poor dc stability, low common mode rejection, easily destroyed by static charges, 1.125 in. O/a lg, 1.125 in. O/a w, 0.700 in. O/a h, temperature range minus 40 degrees to plus 85 degrees celsius

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli
