End Application:

Ground wire equipment-wire projects

Component Type And Quantity:

3 capacitor and 1 diode and 1 filter and 8 microcircuit and 9 resistor and 8 transformer and 10 transistor

Special Features:

Excl circuit card assembly; usage design-200 watt power amplifier

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A51110
