Overall Length:

8.750 inches

Overall Height:

4.500 inches

Overall Width:

4.500 inches

End Application:

An/fsq-114

Component Type And Quantity:

12 transistor and 8 resistor

Special Features:

Power amp subassy 1; usage design-linear power output amplifier used in the polar axis to produce current necessary to drive the torque motor; mounting method-drawer

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A5110
