Reliability Indicator:

Not established

Inclosure Type:

Fully enclosed

Winding Function And Quantity:

3 control and 1 primary and 1 secondary single component

Dc Resistance Rating In Ohms:

5.230 single component single secondary

Special Features:

Two terminals are shared by three control windings

Terminal Type And Quantity:

8 wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
