Overall Length:

19.000 inches

Overall Height:

5.250 inches

Overall Width:

14.000 inches

Operating Temperature Range:

+0.0/+55.0 degrees celsius

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Operating Control Method:

Manual

Circuit Construction Type:

Solid state

Frequency Per Channel:

45.0 hertz operating channel and 20.0 kilohertz operating channel

Connection Contact Type And Quantity:

2 pin external

External Ac Operating Voltage In Volts:

115.0 1st voltage and 230.0 2nd voltage

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A32200
