Average Life Measurement:

Not rated

End Application:

B-52 aircraft; integrated conventional stores management system

Installation Design:

Mechanical

Circuit Construction Type:

Solid state

Special Features:

Contains circuit card assembly 2; wiring harness 1; module 2; filter box assembly; connector mounting 499-11024-501; miscellaneous hardware

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
