Overall Length:

2.240 inches

Overall Height:

0.660 inches

Overall Width:

1.140 inches

Operating Temperature Range:

-54.0/+85.0 degrees celsius

Average Life Measurement:

Not rated

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Installation Design:

Module

Circuit Construction Type:

Solid state

Frequency Per Channel:

6.0 gigahertz operating channel and 18.0 gigahertz operating channel

Overall Gain:

20.0 decibels

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
