Radio Frequency Amplifier - Page 1 of 2

View Online at https://aerobasegroup.com/nsn/5996-01-361-4972

Inclosure Material:
Aluminum
Overall Length:
21.240 inches
Overall Height:
3.500 inches
Overall Width:
18.240 inches
Operating Tempurature Range:
+0.0/+50.0 degrees celsius
Cubic Measure:
0.733 cubic feet
Average Life Measurement:
Not rated
Basic Shape Style:
Rectangular or square
Maximum Operating Altitude Rating:
10000.0 feet
Inclosure Type:
Encased
Operating Control Method:
Manual
Manual Installation Design:
Installation Design:
Installation Design: Top of cabinet/counter and rack
Installation Design: Top of cabinet/counter and rack Control Type:
Installation Design: Top of cabinet/counter and rack Control Type: Local
Installation Design: Top of cabinet/counter and rack Control Type: Local Circuit Construction Type:
Installation Design: Top of cabinet/counter and rack Control Type: Local Circuit Construction Type: Solid state
Installation Design: Top of cabinet/counter and rack Control Type: Local Circuit Construction Type: Solid state Frequency Per Channel:
Installation Design: Top of cabinet/counter and rack Control Type: Local Circuit Construction Type: Solid state Frequency Per Channel: 4.0 gigahertz operating channel err-100 and 8.0 gigahertz operating channel err-100
Installation Design: Top of cabinet/counter and rack Control Type: Local Circuit Construction Type: Solid state Frequency Per Channel: 4.0 gigahertz operating channel err-100 and 8.0 gigahertz operating channel err-100 Average Power Rating Per Channel:
Installation Design: Top of cabinet/counter and rack Control Type: Local Circuit Construction Type: Solid state Frequency Per Channel: 4.0 gigahertz operating channel err-100 and 8.0 gigahertz operating channel err-100 Average Power Rating Per Channel: 10.0 watts output
Installation Design: Top of cabinet/counter and rack Control Type: Local Circuit Construction Type: Solid state Frequency Per Channel: 4.0 gigahertz operating channel err-100 and 8.0 gigahertz operating channel err-100 Average Power Rating Per Channel: 10.0 watts output Overall Gain:
Installation Design: Top of cabinet/counter and rack Control Type: Local Circuit Construction Type: Solid state Frequency Per Channel: 4.0 gigahertz operating channel err-100 and 8.0 gigahertz operating channel err-100 Average Power Rating Per Channel: 10.0 watts output Overall Gain: 30.0 decibels
Installation Design: Top of cabinet/counter and rack Control Type: Local Circuit Construction Type: Solid state Frequency Per Channel: 4.0 gigahertz operating channel err-100 and 8.0 gigahertz operating channel err-100 Average Power Rating Per Channel: 10.0 watts output Overall Gain: 30.0 decibels Connection Type And Location:
Installation Design: Top of cabinet/counter and rack Control Type: Local Circuit Construction Type: Solid state Frequency Per Channel: 4.0 gigahertz operating channel err-100 and 8.0 gigahertz operating channel err-100 Average Power Rating Per Channel: 10.0 watts output Overall Gain: 30.0 decibels Connection Type And Location: Receptacle, coaxial front
Installation Design: Top of cabinet/counter and rack Control Type: Local Circuit Construction Type: Solid state Frequency Per Channel: 4.0 gigahertz operating channel err-100 and 8.0 gigahertz operating channel err-100 Average Power Rating Per Channel: 10.0 watts output Overall Gain: 30.0 decibels Connection Type And Location: Receptacle, coaxial front Operating Ac Frequency In Hertz:

1 receptacle, coaxial internal

Connection Contact Type And Quantity:

NSN 5996-01-361-4972

Radio Frequency Amplifier - Page 2 of 2

External Ac Operating Voltage In Volts:

99.0 single voltage and 132.0 single voltage

Phase:

Single

Special Features:

Front panel controls: prime power on/off, rf operate/standby (fault reset). Front panel indicators: prime power on/standby, rf operate, fault. Metering: helix current. Protection: prime power fuse, warm up delay, automatic sequencing of high voltage and beam current, unattended protection (heater shutdown after fault counter trip), helix current overload, high temperature low/high line voltage, safety interlocks. Equipment case, is a self-contained designed for bench top or rack mount. Auto recycle if power outage is lessthan 3 seconds. Automatic turn off if two consecutive helix overload faults occur: noise figure 35db max: spurious modulation m50dbc max: load vswr 2.5: 1 max: gain stabili type 0.25db/24hrs: maxoperating humidi type 95pct

Relationship To Similar Equipment:

6625-01-034-6118

Shelf Life:

N/a

Unit Of Measure:

__

Demilitarization:

Yes - demil/mli

Fiig:

A32200
