Overall Length:

2.780 inches

Overall Height:

0.787 inches

Overall Width:

0.900 inches

Average Life Rating:

2000.0

Average Life Measurement:

Hours

Basic Shape Style:

Rectangular or square

Circuit Construction Type:

Solid state

Overall Gain:

23.0 decibels

Impedance Rating Per Channel:

50.000 ohms operating channel

Criticality Code Justification:

Feat

Special Features:

Electrostatic discharge sensitive

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
